A TYPICAL DAY

This is an example of a typical day.
Timetable will be setup daily according to the day's activities.

WORKING METHODOLOGY

The main goal of the camp is for participants to disconnect from their usual routine, change their physical setting (especially after a long year of restrictions), and strengthen their social relationships.

In this context, through the numerous activities that they take part in, students will develop different skills, which are important in determining the individual capacities of leadership and creativity.

Therefore, each activity is preceded by a collective task (such as the discussion of a case, a role-playing game, the inspiration of a video or a song, etc.) as well as a subsequent reflection in order to assess how each participant has experienced the activity.

SUMMER CAMP

ECOLAB (RECOVERY ROAD)

Different paths pass through La Molina, which, due to the winter weather, are impassable in the spring.

From the Summer Camp we are aiming to carry out the recovery and reconstruction of the roads that people will use during the summer and autumn.

This involve clearing of roads, construction of bridges, walkways and dams on the river. The target is to add value to high mountain trails and make students aware of the importance of maintaining forests and the natural environment.

TALENT SHOW

Music, theater, cinema, imitations, costumes; anything is worth it if you can show your creativity to your classmates.
